Experience

Software Developer (AI Application) Intern, Webo Healthtech , Ahmedabad Sept 2025 – Present

- Clinical Study Report generation system
- Rag System for internal documents

Data Science (AI/ML) Intern, Infolabz , Ahmedabad Jan 2025 – June 2025

- Worked on data preprocessing pipelines using NumPy and Pandas for CSV, Excel, and API datasets
- Developed and optimized supervised (regression, classification) and unsupervised (clustering) ML models using scikit-learn
- Built Streamlit applications and Power BI / Matplotlib dashboards for model insights, visual analytics, and decision-making

Projects

Clinical Study Report (CSR) Generation Backend

- Designed and built a DAG-based CSR generation backend using Python and FastAPI, converting YAML mappings and Word templates into regulatory-ready Clinical Study Reports by pulling study data from APIs
- Implemented asynchronous task orchestration with Celery (retry, backoff, progress tracking), input validation, and audit logging, storing generated documents in MinIO with PostgreSQL metadata
- Unified multiple data-to-document operations into a scalable pipeline supporting tables, paragraphs, and dynamic layouts, enabling configurable styling and reusable report components

Intelligent Customer Segmentation & Analytics Dashboard for B2C Growth GitHub

- Full-Stack Data Application: Developed an interactive web app using Python and Streamlit with secure authentication and a dynamic dashboard to visualize customer demographics and spending trends via Plotly
- Generative AI Integration: Integrated Google Gemini AI (1.5 Flash) to build an embedded chatbot that allows users to query datasets using natural language for instant, context-aware insights
- Data Analysis & Visualization: Implemented data pipelines using Pandas to process customer metrics and created comprehensive visualizations (scatter plots, histograms) to support B2C segmentation strategies

Skills

Languages & ML: Python, NumPy, Pandas, scikit-learn, TensorFlow, OpenCV

Backend & Data: FastAPI, Celery, PostgreSQL, MinIO

Visualization & DevOps: Plotly, Power BI, Streamlit, Docker, GitHub, Jenkins

Certification

- Python Basics for Data Science, IBM
- Data Analytics Job Simulation, Deloitte

Education

Sal Engineering and Technical Institute, Ahmedabad 2022 – 2025

- BE in Computer Science, CGPA: 7.30/10.0

Government Polytechnic, Gandhinagar 2019 – 2022

- Diploma in Computer Engineering, CGPA: 8.07/10.0
